Morehouse School of Medicine
Psychiatry Residency Training Program
Application Requirements

Hello and Greetings! My name is Tiffany Burns and I am the Psychiatry Residency Program Manager at Morehouse School of Medicine. Thank you for your interest in our General Psychiatry Residency Training Program. There are only **four (4)** available PGY -1 positions available thru the National Residency Match Program (NRMP) each academic year. We **only** accept applications thru ERAS (**E**lectronic **R**esidency **A**pplication **S**ervice). Our application deadline is December 1st of each academic year. For more information about our program, please check out our website at www.msm.edu and for more information about ERAS, please see www.AAMC.org

Applicants must pass USMLE Step 1 by the **third attempt** and Step 2 Clinical Knowledge (CK) and Clinical Skills (CS) must be passed within **two (2) attempts and prior to submission of the NRMP Ranking List**. You must have three (3) professional letters of reference (***written within the last 18 months***) ***and at least one of those letters needs to be from a Psychiatrist.*** A letter from the Dean of your medical school is also required.

Recent U.S. patient care experience and documentation of that experience is strongly recommended, preferably in Psychiatry. We do not offer any observerships and/or externships within Morehouse School of Medicine's residency training programs.

We will support non-immigrant applicants selected to a position in the program in getting J-1 sponsorship by the ECFMG (no H1B visas). However, for all international medical graduates, the ECFMG certificate must be in-hand and not pending with the exception of candidates who are graduating within this academic year.

Thank you for your interest in Morehouse School of Medicine's General Psychiatry Residency Training Program and I look forward to seeing your application on ERAS this fall. If granted an interview, all candidates must bring original credentials for verification by program.
