

RTRN's RCC Research Implementation invites you to a webinar series:
Research Up-Close & Personnel: Starting AUG 2016 (4th Thursdays @ 3:00 PM EST)

Beatrice Gee

Susan Rogers

Priscilla Johnson

Children & Research

- by Morehouse School of Medicine Associate Professor [Beatrice Gee](#), M.D., FAAP
- Pediatrics: Interim Associate Director for Translational Science, Cardiovascular Research Institute
 - Specialties:
 - Sickle Cell Hematology Oncology
- [Thursday, Aug. 25, 2016 3pm EST](#) (9:00am HT; 12:00pm PT; 2:00pm CT; 3:00pm ET; 3:00pm AT)

Role of the Research Pharmacist

- by Emory University Hospital Drug Information Pharmacist [Susan Rogers](#), RPh
- Susan Rogers, RPh, received her bachelor of science in pharmacy from the University of North Carolina. Susan completed a residency in Drug Information at The New York Hospital, and began her career at Emory University in 1980 as the drug information pharmacist for Emory University Hospital. During the mid 80s, she initiated the Investigational Drug Service, which has grown from a few Hematology/Oncology protocols to managing 250 protocols for all Emory University investigators.
- [Thursday, Sept. 22, 2016 @ 3 pm EST](#) (9:00am HT; 12:00pm PT; 2:00pm CT; 3:00pm ET; 3:00pm AT)

Good Clinical Practice II

- by Associate Director – Clinical Research Operations [*Priscilla Johnson*](#), MSN, Ph. D
- Johnson is 2014 recipient of the Healthcare Advocate award from Fulton County Commissioner Joan Garner presented by the Fulton-DeKalb Hospital Authority Healthcare Champion awards ceremony.
- [Thursday, Oct. 27, 2016 3pm EST](#) (9:00am HT; 12:00pm PT; 2:00pm CT; 3:00pm ET; 3:00pm AT)

Why should you be interested in this series?

Research touches EVERYONE. Ensure that you and those around you are doing their part effectively and efficiently!

Are children able to participate in research?

YES! Children are a vital part of the life cycle and just like adults they have the potential to get sick and suffer from life threatening diseases. In order to effectively fight and attempt to cure illness and disease children are need in research. As a result of this need as with anything else in life there are rules and boundaries. Do you know them? Are children little adults? Are children able to decide whether they participate in research? Who gets the final decision parent or child patient? These and many more questions will be answered. Join the conversation and collaboration.

How is a Research Pharmacist differ from a Pharmacist?

What is the drug make up? How might the does affect patients? How does the drug need to be handled? What does the protocol say versus what is the institutional standard for drug dispensation and destruction? Which patient took what drug, when and how much? Your local research pharmacist should be able to answer these and many more questions.

What is GCP?

Good Clinical Practice is defined as the internationally- recognized standard for the design, conduct, recording and reporting of clinical trials involving human subjects. Adherence to the principles of GCP is essential in ensuring ethical standards and scientific quality, while providing public assurance that the rights, safety and well-being of trial subjects are protected. This website focuses on the practical implementation of GCP standards, with an emphasis on training and development....per www.goodclinicalpractice.com

To JOIN the WEBINAR:

1. Copy and Paste the URL into your web browser: <https://rtrn.adobeconnect.com/ResearchRTRN>
2. Select: Guest; then type: Your Name and Institutions (e.g. John Smith- TSU)
3. Click Enter Room
4. **Connect to Audio, by dialing:** Toll free: [1.888.263.2724](tel:18882632724); enter the participant code: 598 5959#
5. **Identify Yourself:**
 - a. Choose “Dial in” option.
 - b. Call from your office and mobile
 - c. Enter *29 plus the four digit code
 - d. Press #

We look forward to speaking with you soon!
