**Varicella (CHICKEN POX) Vaccination Consent Form**

**VARICELLA**-also called chickenpox is a common childhood disease. It is usually mild, but it can be serious, especially in young infants and adults. The chickenpox virus can be spread from person to person through the air, or by contact with fluid from chicken pox blisters.

**VACCINE**-If no serology proof is presented to show immunity. It is recommended that if you have never had chickenpox or received chickenpox vaccine you should receive two doses at least 28 days apart.

**ADVERSE REACTIONS**-Recipients of the vaccine may experience local reaction such as soreness, swelling and redness at the injection site. A low-grade fever occurs occasionally. Other complaints may include a mild rash or seizure (jerking or staring) caused by fever (very rare).

**CONTRAINDICATIONS**- Pregnancy or possibility of pregnancy within 1 month. If you have had a severe allergic reaction to a previous dose of chickenpox vaccine or to gelatin or the antibiotic neomycin. If you or moderately or severely ill at the time of shot. If you have any disease that affects the immune system.

**CONSENT**

**Print Name**\_\_\_\_\_

I \_\_\_\_\_ authorize the Morehouse School of Medicine Student/ Employee Wellness Center to administer Varicella vaccine to me.
