MAPS vs. PMED Protocol

- ***Minority Association of Premedical Students***

- Undergraduate and post-bac student-run chapters that extend the mission of SNMA to the premedical arena. MAPS chapters are to be affiliated with a SNMA chapter who will carry out the PMED protocol.

- ***Pre-medical Minority Enrichment & Development*** – SNMA chapter initiative that provides outreach to premedical students through mentoring, academic programs, etc.

“what med school chapters do for undergrads”

MAPS is a key part of the SNMA mission...

"...increasing the number of African-American, Latino, and other students of color entering and completing medical school."

- Workforce diversity key aspect of reducing and eliminating health disparities
- The number of minorities entering middle school has been declining at a faster rate than the matriculation rates for majority students
- Physicians of color are more likely to practice in underserved areas reaching underprivileged populations

Goals of MAPS

- To provide underrepresented pre-med students with knowledge, skills, and experience that are both prerequisite & concomitant to professional participation in health care fields
- To improve minority student matriculation into all professional health related programs, with an emphasis on medicine
- To encourage culturally conscious physicians by increasing awareness of issues that underrepresented communities face
