Making Student Dreams A Reality

MOREHOUSE SCHOOL OF MEDICINE
WOMEN WITH HEART

Scholarship Impact

Women With Heart Giving

Morehouse School of Medicine has a bold vision for growth, a vision that would not be possible without our generous friends and supporters.

Over the last nine years, MSM's Women With Heart Initiative has played a key role in this growth, as proceeds from the event support student scholarships.

Since 2011-12, donors to WWH have provided \$688,122 in scholarship support, which includes awards to 113 students. The average scholarship award through the Eilene Maupin Women With Heart Scholarship Fund is over \$6,000

per scholarship award.

These gifts make an incredible difference in the lives of MSM

students and better enable our institution to prepare them for lives of service while helping to develop the critical thinking skills necessary to succeed in an ever-changing and challenging work force.

In its nine-year history, WWH has

raised \$1.375 million and has received gifts from 983 donors.

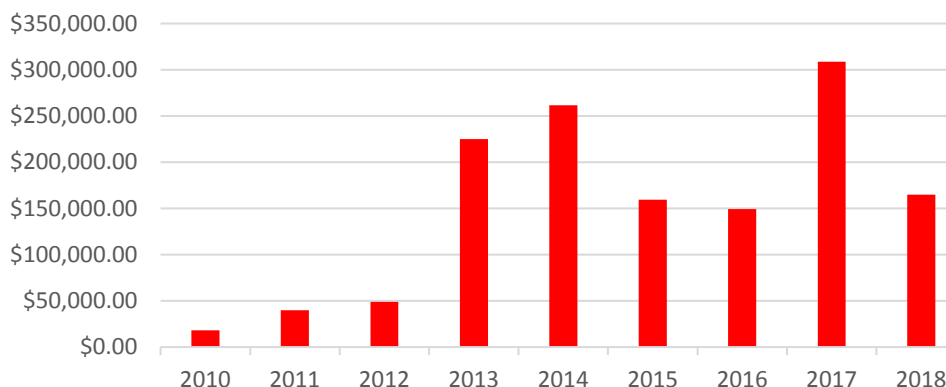

Over the last several years, Morehouse School of Medicine has made concerted effort to increase scholarship support for our students, and it has correlated with enrollment being at an all-time high. As enrollment grows, our ability to improve healthcare access, quality of care, and health outcomes increases exponentially.

Our impact in these areas is evidenced by the fact that 66 percent of MSM M.D. Alumni serve in primary care, in addition to 54 percent of them serving Medically Underserved Areas (MUA) of both urban and rural communities.

Through continued scholarship support like Women With Heart, we ensure our graduates maximize their educational opportunities, while instilling a mission to serve others. It has shaped the landscape at MSM and, in doing so, influenced the trajectory of health and healthcare across the state of Georgia, the nation and the world.

AWARD

Thank you for awarding me the Eilene Maupin Women With Heart Scholarship. I have aspired to be a physician since I was a child, and I am humbled to be one step closer to actualizing this dream.

As an Atlanta native, I look forward to practicing here in the metro area, particularly with underserved communities, as a pediatrician.

Again, thank you for providing me this gracious gift. Your financial support has helped to alleviate much of the stress often associated with funding medical school. I feel confident that I can now focus my energy on successfully completing my medical degree."

– Maureen Egbosiuba
Class of 2019

"I am so thankful to be a recipient of the Eilene Maupin Women With Heart Scholarship.

The opportunity to attend Morehouse School of Medicine has been a dream come true. I am so grateful to complete rotations at institutions like Grady Hospital, where I can serve the underserved community and make a small difference in the lives of the patients I encounter.

Your financial assistance has lightened my financial load and has enabled me to concentrate on my education and my family. Your generosity serves as a reminder of my future goals of serving my community and giving back to the less fortunate."

– Nikkia Blake

MOREHOUSE SCHOOL OF MEDICINE
WOMEN WITH HEART

Scholarship Impact

Women With Heart Scholar – Alcha Strane

Alcha Strane isn't one to back down from a challenge. If she was, she wouldn't have made it through college on a basketball scholarship — at just 5'4".

"I was always the shortest one on my team," Strane said. "But in my family, we had to finance our own way through college, so I decided early on I was going to get a basketball scholarship."

Strane is from Hayward, California, in the San Francisco Bay area. The youngest of five, she grew up playing sports with her four older brothers. In college, she competed on the basketball court while following a pre-med track, graduating from the University of San Diego with a psychology degree.

She continued her education at Morehouse School of Medicine (MSM), where she was inspired by the school's commitment to social responsibility. "From the beginning, we were expected to be agents of positive social change," she said. "We learned to work with vulnerable populations who were medically underserved and didn't have access to things like healthy food and reliable transportation."

At MSM, Strane helped to create a community needs assessment for a local health center. "My research partner and I went out to train stations, barber shops, grocery stores and everywhere else to ask people what they needed to improve their health," she said. "Their feedback helped us advise the health center

about changes they could make to better address the needs of local residents."

Strane's community assessment grew into a larger service project, the Cancer Health Advisory for Growth and Empowerment (CHANGE). "It's actually an app we developed that provides health education for people who don't have easy access to health information they can understand and trust," she explained.

While at MSM, Strane received a scholarship from National Medical Fellowships funded by the United Health Foundation's Diverse Scholars Initiative. When she attended the Diverse Scholars Initiative Forum, she was able to learn about some of the latest developments in health care research.

"I met so many different scholars and heard so many different perspectives," Strane said. "We saw really cool, innovative approaches to using big data, which was exciting to me as a researcher."

After graduating from MSM, Strane began her obstetrics and gynecology residency at Wellstar Kennestone Hospital in Marietta, Georgia. As a resident, she will use the cultural competence skills she learned from her work at MSM.

"As providers, we need to ask our patients questions and listen to them carefully and respectfully," she said. "So much of a person's health is related to their culture, and if we are aware of different perspectives, we can do a much better job of providing the care they need."

MOREHOUSE SCHOOL OF MEDICINE
WOMEN WITH HEART

Scholarship Impact

Women With Heart Scholar – Alyssa Watkins

Alyssa Brooke Watkins is a young woman determined to pursue her dreams and make a positive mark in the world. Even at a young age, she has begun to do just that.

Since graduating in 2017 from Morehouse School of Medicine, she has been a physician in residency at the internationally renowned Mayo Clinic in Rochester, Minnesota, where her concentration is in Obstetrics and Gynecology. She previously participated in Emory University's Summer Science Academy as a residential assistant and mentor, and traveled with the Morehouse School of Medicine's mission trip to Port-au-Prince, Haiti.

Monique Merritt-Atkins, M.D.

2017 MSM Graduate & WWH Scholarship Recipient

• *What kind of impact did a scholarship have on you?* Receiving a scholarship meant that someone believed in me, just as much as I believed in myself. It let me know that someone else sees something in me as much as I see something in myself. And that's a sense of hope.

• *What have you accomplished that you are most proud of?* I am so proud of making it through this journey, and I can't thank my friends and family enough. I was raised by a single mother. My father was an alcoholic and my mom pretty much did everything for me. In medical school, we are not able to work and most of the funding either comes from scholarships or loans. The scholarship support I received allowed someone like me to fulfill their dreams.

• *What would you like to say to the donors who provided your scholarship support?* Thank you for the impact you have had on my life. Serving the less fortunate is a passion for me because I come from similar circumstances. MSM has inspired me to be a community leader, in addition to being a physician.

Alyssa is the daughter of the late Audrey Craig-Watkins and James Watkins, Jr. Her mother was a registered nurse who worked in the Oncology department at Duke Medical Center in Durham, NC, specializing in cancer treatment. Unfortunately in 1991, she herself contracted cancer, and succumbed to her illness in 1993, when Alyssa was still a small child.

Her father returned to his hometown of Asheville, where he was able to rely on the support and help of family members in raising his children. With that support, Alyssa graduated from T. C. Robinson High School in 2008 with a grade point average of 4.5.

Alyssa was granted a four-year scholarship to attend Clark Atlanta University, where she was a member of the Golden Key National Honor Society, joined Beta Kappa Chi, was on the Dean's List, and served as a peer teaching assistant. In 2012 she graduated summa cum laude with a BS in Biology (with Distinction).

After earning her degree at Clark Atlanta, Alyssa spent a year at the National Institutes of Health (NIH) Research Center in Baltimore, MD. There she researched the differences between "Ideal" and "Non-Ideal" patients enrolled in the Baltimore Longitudinal Study on Aging, investigating the various markers that can be used in the predication of Type-2 Diabetes.

In 2013, Alyssa was accepted to Morehouse School of Medicine, and began fulfilling her true calling as a physician—following her mother's footsteps. In addition to student medical associations and organizations, Alyssa—Dr. Watkins—is a member of the American Medical Women's Association and the National Medical Association.
