

CADET

Cancer Associated Development of Education & Training
Summer Research Experience

CADET is based on a framework for addressing cancer prevention and control from bench to bedside to community and will emphasize research methods targeted at reduction and elimination of cancer outcome variations. This 8 -week dynamic research experience will feature an independent longitudinal lab project under the guidance of cancer researchers, supplemented by scientific conferences and lecture series, journal clubs, group projects, grand rounds, field trips , workshops , career development and mentors. Interested undergraduate students are encouraged to apply. Application deadline:
March 1, 2026

PROGRAM DATES: JUNE 1-JULY 24, 2026
