Office of
Global Health Equity

INVITES YOU TO ITS
GLOBAL HEALTH EQUITY LECTURE SERIES

Natural Healing Approaches to COVID-19

THURSDAY, MARCH 11
12:00-1:00 PM

ERICK GBODOSSOU, MD
PRÉSIDENT DE PROMETRA
INTERNATIONAL, SENEGAL

REV FR DR ANSELM ADODO, PHD
DIRECTOR PAX HERBAL CLINIC & RESEARCH
LABORATORIES
EWU, EDO STATE, NIGERIA

ARLETHA W. LIVINGSTON (LIZANA), PHD MPH MBA
ASSISTANT PROFESSOR
FAMILY MEDICINE
MOREHOUSE SCHOOL OF MEDICINE

MODERATOR

REGISTER IN ADVANCE FOR THIS WEBINAR:

GLOBAL HEALTH EQUITY LECTURE SERIES: NATURAL HEALING APPROACHES TO COVID-19

WELCOME & HOUSEKEEPING

Gilberte “Gigi” Bastien PhD
Associate Director, MSM/OGHE

**Natural Prevention & Natural Health Approach
to COVID-19**

Erick V. A. Gbodossou, MD
President, PROMETRA International

In reality, there are two Medicines

- **A simple medicine, which is as old as humanity, as old as pain and which has proven itself throughout the ages**
- **A conventional medicine, created in the name of modernism only for the past few centuries. This medicine is increasingly becoming a medicine of power – a medicine of business. Based on the Cartesian system, it is a brake on the development of human sciences in general and well-being in particular. It ignores life, which is energy**

THANK YOU MOREHOUSE SCHOOL OF MEDICINE

Thank you for talking about the natural approach, prevention and cure of COVID-19

If we refer to nature and to Africa, it is because:

- Conventional medicine has shown its limits
- African medicine remains the hope for the health & well-being of our humanity

You know in the 17th century, with the discovery of bacteria as a pathogen, the prescription in those days was to kill the bacteria

It was the advent of antibiotics. Where are we today? Bacterial resistance with its worrying future. Besides, you know that without bacteria there is no life on earth

To benefit greatly from African medicine, it is necessary to change the logic and rationality

Africa, mother of all civilizations, has other realities that can highly contribute to global health

Natural Prevention of COVID-19

's preventive solutions for Covid-19 pandemic

**PROMETRA'S PREVENTIVE
SOLUTIONS TO THE
COVID-19 PANDEMIC**

11:02

Traditional use of....pdf

- For the past year I have recommended to my community to keep a plant in their mouth to prevent COVID-19
- To date, no one in this community has become infected. The community has a population of 10,000

Natural Prevention of COVID-19

If I get vaccinated:

- 1) Can I stop following social distancing and not wear a mask for example? The answer is NO!**
- 2) Will everyone be able to go back to their work normally, open schools, bars, restaurants, cinemas, etc.? The answer is NO!**
- 3) Would I be resistant to the coronavirus if I get vaccinated? The answer is NO!**
- 4) At least won't I be contagious anymore? The answer is NO!**
- 5) Will the vaccination increase my immune system? The answer is NO!**
- 6) Can I stop social distancing? The answer is still NO!**

So what is the real benefit of vaccination?

Memorandum of Understanding

A scientific breakthrough
that will change the way
we fight disease.

Andrew Young Presents

A World Premiere Event on Tuesday, April 25

STRONG MEDICINE

THE SECRET POWER OF AFRICAN HEALING

Strong Medicine

A one hour documentary that was shown in over 80 US media markets on commercial and public broadcasting television stations. In Atlanta WSB Channel 2

NATURAL HEALTH APPROACH OF COVID 19

**BEFORE WE CAME TO MOREHOUSE SCHOOL OF MEDICINE,
PROMETRA CONDUCTED CLINICAL RESEARCH INVOLVING
AFRICAN HEALERS**

IMPLICATIONS OF HEALERS IN THE FIGHT AGAINST HIV/AIDS

Setting up of an International Legal and Scientific Committee

The International Legal and Scientific Committee after an audience with the President of the Republic of Senegal

This Scientific Committee has set up ways and means of a credible research, with the elaboration of Clinical and Paraclinical Monitoring Sheets approved by NIH (National Institute of Health) and University of Bastyr, USA.

Establishment of a partnership with reference laboratories :

- ❑LABCORPS IN USA;
- ❑INSTITUT PASTEUR IN DAKAR.

ANALYSIS						
Decrease of the viral charge	0 to 20%	21 to 40%	41 to 65%	66 to 80%	81 to 100%	Total
Number of cases	8	3	16	6	29	62
Augmentation of the CD4	0 to 50%	51 to 100%	101 to 200%	201 to 300%	> 300%	Total
Number of cases	14	9	18	13	8	62

Comments:

- 56,4% of the patients have seen their viral charge decreased for more than 66% [from 66 to 99,9%]
- The CD4 rate have increased for more than 100% with over 39 patients [from 100 to 500%]

METRAFAIDS has a positive impact on the health of PLWHAs:

- ◆ Good evolution of opportunistic diseases;
- ◆ Amelioration of the psychology statement of patients;
- ◆ Good evolution of patients' weights, from 02 to 12 kg within 04 months of treatment;
- ◆ Disappearance of Diarrhea;
- ◆ Disappearance of insomnia, depressive statements, acute and chronicle fevers, as well as deep asthenia.

Purulent Over-Infected Zona Temporo-Cervico-Maxillary Oct 15, 2001

Clinical Good Evolution of Zona Temporo-Cervico-Maxillary; Dec 15, 2001

Skinning and normalization of shingles
Temporo-Cervico-Maxillary; March 15, 2002

Credible Science

Validated Protocols
Excellent Help of laboratories
Elevated Statistics

Positive Clinical Results

Decrease of the viral load
Increase of the CD-4
Opportunist illnesses
elimination

**A medicine based on
Innocuity and efficiency**

In the Center for Experimental of African Medicine (CEMETRA) in Fatick, Senegal these same products are used to heal many viral diseases

It has been proven with MSM collaborative research the efficacy against HIV, Herpes, Ebola and Influenza.

What we saw...

- A small study of 62 patients from Senegal living with AIDS (1999) was given only herbal therapy for 6 months in a research center in Fatick, Senegal.
- After 6 months of treatment, viral loads went down and T cell counts went up.
- After more than 15 years without treatment and therapy, the blood of the patients is free of virus
- **How can short-term treatment cause a long-term suppression of virus?**

What we saw...

The extracts continue to have an effect even after removed from the virus

How it works...

- The collaborative research show that the protein from the plant is responsible for this activity.
- These antibodies suppress the virus long-term and keep virus at undetectable levels.

How it works...

Patient's Serum

A world map outline in a light brown color, centered on a blue gradient background. The map shows the continents of North America, South America, Europe, Africa, Asia, and Australia.

**THE FUTURE OF THE SOLUTION OF THE
CORONAVIRUS DEPENDS ON THIS TYPE OF
COLLABORATIVE RESEARCH**

Unlimited Possibilities

- This research is progressing to the development and commercialization of a natural HIV medication (pharmaceutical and nutraceutical products) – first of many
- Possibility that this product may also be a vaccine candidate
- Possible development of therapies for other viral diseases such as Ebola, hepatitis, Zika, herpes and influenza
- PROMETRA has plant based treatments for many other human pathologies
- Commercial benefit to MSM, NPRC & PROMETRA
 - MSM developing a NPRC business arm to produce, manufacture and distribute a line of nutraceuticals
 - NPRC becomes the industry leader in the characterization and validation of natural product for national and international customers

We can no longer ignore, disrespect or underutilize African healers

We must recognize the role they can and must play in achieving global health equity for all

The price of failure is too great

The time to act is now

Thank you

The mission of
PROMETRA International
is to preserve African traditional medicine,
culture and indigenous science
through research, education, development,
advocacy and service and
to improve the health and well being
of Africa and the diaspora.

GLOBAL HEALTH EQUITY LECTURE SERIES: NATURAL HEALING APPROACHES TO COVID-19

NATURAL HEALING APPROACHES TO COVID-19

Fr Anselm Adodo
Pax Herbal Clinic & Research Laboratories,
Ewu, Nigeria

NOMENCLATURE

- -Natural Medicine
- -Alternative Medicine
- -Herbal Medicine
- -Traditional Medicine
- -Complementary Medicine
- -Native Medicine
- -Unconventional Medicine
- -Folk Medicine

AFRICAN HERBAL MEDICINE

1. Evidence- based
2. Verifiable

Scientific Disciplines:

1. Plant biotechnology
2. Plant chemistry
3. Pharmacognosy
4. Pharmacology
5. Taxonomy etc etc

OBJECTIVES

- 1. Discourse about African herbal medicine or Plant Medicine with C-19 in focus**
- 2. Discuss C-19 within the Nigerian/African context**
- 3. Focus on Paxherbals C-19 research efforts**

WHAT IS THE GOAL OF MEDICINE?

MODERN OR ANCIENT?

"All medicine is modern in so far as it is satisfactorily directed towards the common goal of providing health care, despite the setting in time, place and culture".

-World Health Organization (1977)

PRINCIPLES OF AFRICAN HERBAL MEDICINE

WHY DO WE FALL SICK?

- 1. When unwanted external entities get into the body.**
- 2. When some needed nutrients are lacking in the body.**
- 3. When our body immunity is weak.**
- 4. When external or genetic events or genetic factors interfere with the normal functioning of the body.**

**ALLOPATHIC APPROACH TO HEALTH
OFTEN SEES MEDICINE AS WAR: AGAINST**

- 1. BACTERIA**
- 2. INFECTIONS**
- 3. VIRUSES**
- 4. PARASITES**

NATURAL MEDICINE

SEES LIFE AS NOT JUST ABOUT
BEING ALIVE BUT *BEING*
WELL.

PAXHERBALS AND COVID-19 RESPONSE
